**ACCESSORIES**  
FOR YOUR  
**MECHATRONIC**  
**WORKSHOP**

# ALL THE **ACCESSORIES** THAT MAKE YOUR WORK EASIER

Magickmotorsport offers a wide range of accessories for mechatronic workshops.

Optimize your workspace and boost your productivity.

The Flexible Tool Case and the Magic Trolley represent the perfect combo to have everything at hand.

Program engine units in total safety with MagBench and with connection cables for engine units and automatic transmissions.

Magic Charger guarantees the correct charging voltage during programming operations in order to work in complete safety.

Simplify your work by choosing the accessories that best suit your needs.

FLEXY

MAGIC  
MOTORSPORT

# FLEXIBLE TOOL CASE

## MUCH MORE THAN JUST STORAGE

Flexible Tool Case is the Magicmotorsport case designed to provide storage for tools, cables, and accessories.

Classic, Hybrid, Pro: three different versions, deeper level of customization. Optimized to contain Flex, Flexbox, and its dedicated kit.

# MAGBENCH MINI

## THE MOST FLEXIBLE JIG TOOL YOU'VE EVER SEEN

Compact, jointed, lightweight, universal, and portable.

The mini jig tool by Magicmotorsport is the comprehensive solution to program both engine units and automatic transmissions in Boot and JTAG.

MagBench Mini allows you to perform stable connections on any electronic device. Thanks to its articulated arms, it clamps on any surface.

**STABLE  
CONNECTIONS**

**COMPACT AND  
LIGHTWEIGHT**

**CLAMP TO  
ANY SURFACE**

# MAGIC TROLLEY

## AVAILABLE IN TWO DIFFERENT VERSIONS

Magic Trolley is the smart solution designed to easily move your complete set of tools and accessories to every corner of your mechatronic workshop.

Everything that is essential for your daily work operations is always at hand and near the vehicle: your programmers, computer, chargers, cables, and everything else you could possibly need.

Trolleys have four floating wheels to ensure better mobility even in very tight spaces, lateral cable drag and four shelves for extra objects.

**CABLE DRAG**

**SPACE FOR  
EVERY TOOL**

**EASILY  
TRANSPORTABLE**

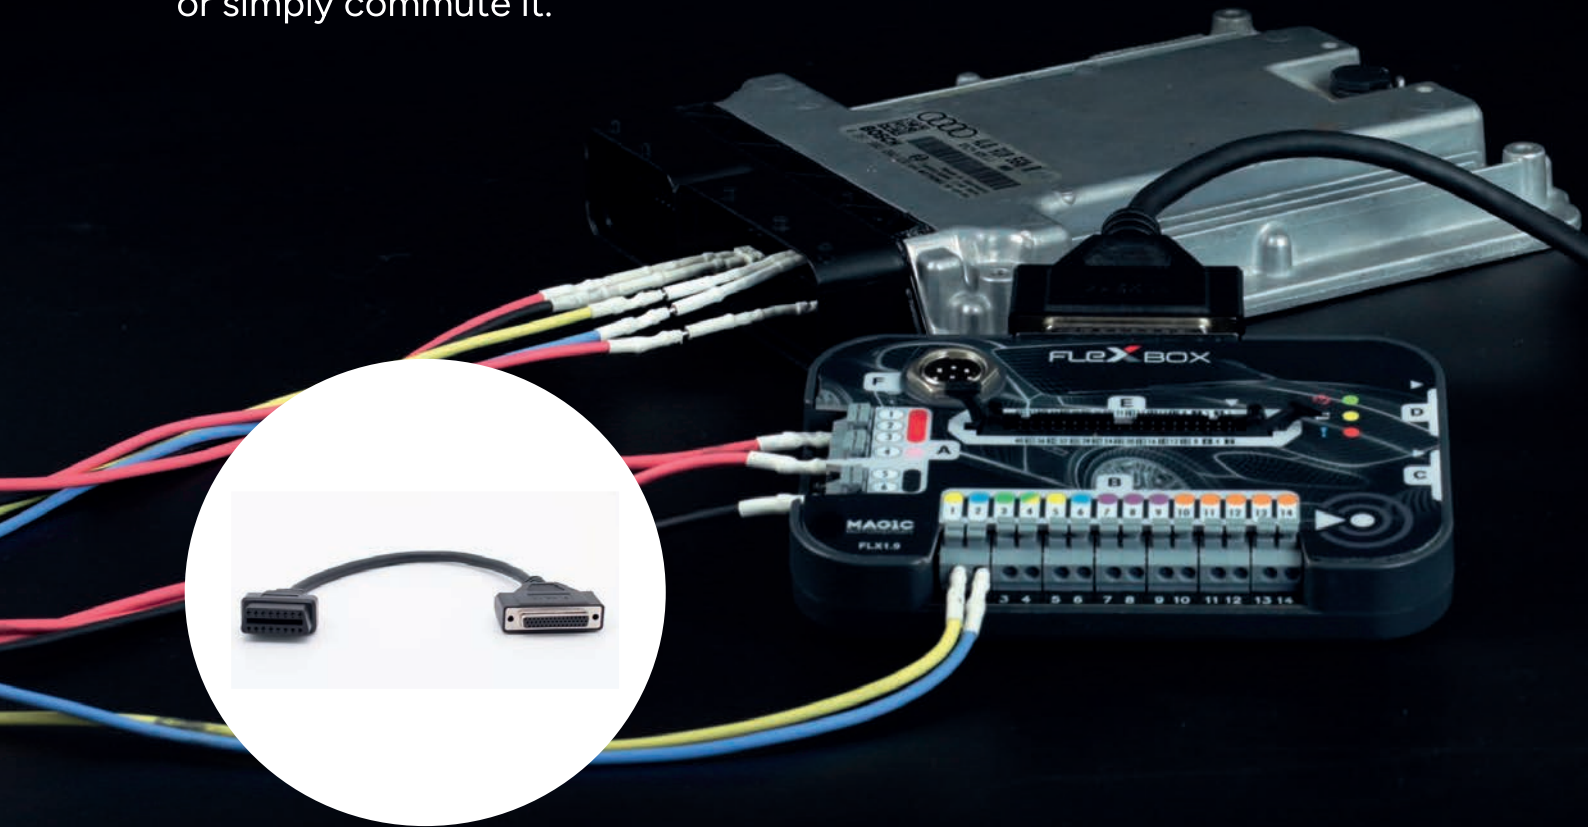

# FEMALE OBD CABLE

## UNLOCK NEW FEATURES ON FLEXBOX

The female OBD cable FLX2.14 allows you connect the Flexbox to the standard OBD socket. This accessory with a 44-pin connector enables the touch button in the Flexbox for you to select one of the four available modes during Bench programming.

By connecting the cable to the electronic unit, you can generate different voltage values useful in different programming steps. Moreover, you can let the programmer manage the Ignition signal or simply commute it.

# CABLES FOR **ECUs** AND **TCUs**

## FAST AND SAFE CONNECTIONS

With connection cables you can safely program engine units and automatic transmission units in Bench mode. Available in kits or individually, they represent an essential addition to your mechatronic garage.

**FOR ENGINE CONTROL UNITS**

**FOR AUTOMATIC TRANSMISSION UNITS**

A close-up, slightly blurred photograph of a car's engine compartment. A hand is visible in the upper right, holding a thick red cable that runs diagonally across the frame. The engine components are dark and metallic, with various hoses and parts visible. The lighting is focused on the red cable, making it stand out against the darker background.

# **MAGIC CHARGER**

## **PROFESSIONAL MULTI-FUNCTION BATTERY CHARGER**

Power supply tool with inverter technology to supply power during vehicle diagnostics and/or programming. Magic Charger ensures the perfect supply for the maintenance of even the most advanced battery models.
