**STAGE X**

**REMAPPING  
SOFTWARE**  
FOR LAST GEN VEHICLES

MAGP8.236EN March 2025

## WHAT IS IT?

StageX is a map editor software that leverages artificial intelligence. It identifies and indexes calibration tabs of engine units (ECUs) and automatic transmission units (TCUs) and simplifies modifications: it is the ideal software for tuning enthusiasts and professionals!

StageX offers DTC removal modules, checksum, automatic solutions powered by artificial intelligence, automatic map identification, and in a few clicks it is possible to modify ECU and TCU calibration curves.

### SMART

Uses Artificial Intelligence

### FAST

Launches in a few seconds

### SAFE

Continuous platform updates

### INNOVATIVE

Works on any device

## SOFTWARE TAILORED TO YOUR NEEDS

Magicsport and the Power Division team are constantly working to increase the number of supported control units, in order to make StageX more and more functional and easy to use.

StageX is cloud-based, updates are recurrent and without any interruption. Launch the software on your favorite browser on a PC, smartphone or tablet (in desktop mode on mobile devices) and choose the right solution that fits your needs.

## 2D & 3D EDITING

The map automatic identification feature correctly detects all the calibration tabs and offers both the 2D and 3D visualization. Modification is therefore simplified by the automatic application of the mappack (driver) that includes the visualization of the conversion factors and units of measurement.

With StageX you can always create your driver and import modifications in a new remapping project. StageX represents the new frontier for tuning!

## MAPPACKS DEVELOPED BY POWER DIVISION COMPLETE DTC DATABASE

StageX boasts a comprehensive mappack database for many ECUs and TCUs, allowing you to carry out your work quickly and safely. Moreover, the software includes the possibility to manage DTCs in calibration files.

## TRY THE REVOLUTIONARY MAP EDITOR SOFTWARE ACTIVATE THE FREWARE VERSION FOR FREE

Activate the StageX freeware version on [stagesx.ai](https://stagesx.ai) and try all the available and continuously expanding features. After testing the software, you can decide to upgrade your account to an Essential (DTC only), Plus, or Advanced license.

All these options will give you access to data and features, and subscriptions will give you more and more advantages. Visit [www.magicsport.shop](https://www.magicsport.shop) and discover all purchase options.

\*Compatible with Windows 7 and later versions, MacOS and Linux: to discover more about operating systems and supported browsers, visit [stagesx.ai](https://stagesx.ai)
